recommend using a stitch marker to keep track of each round! Simply place the marker in the first stitch of the round, and once you make it back to the marker, start the next round!

ss to next st, then fasten off and weave in tail end!

## Bow

Use orange (or the accent color of your choice!)

ch 6

R1: dc in each st (5)

R2: ch 1, turn row; sc across (5)

Fasten off, and leave a long tail, about 12 inches! Weave the tail along the top of the bow until you reach the center; then wrap the tail around the center several times to cinch the bow. Tie a knot in the back, and then sew

the bow on to the colored stripe on the hat (I sewed mine over the spot where the rows meet up, to hide the “jog” created by changing colors).

### Assembly

Trace around the brim of the hat onto your felt. I found it was easiest to see when I used a white colored pencil! Once traced, cut your felt circle out.

Take some polyfil and stuff the point of the hat – not too firmly, but enough so it will keep its shape when worn. Then, apply hot glue around the outside of the felt circle, and put a few blobs of it in the center of the circle. Then, press the bottom of the hat’s brim to the felt, smoothing out the hot glue with your fingers.

Using more black felt, cut two circles to affix the barrettes. Apply a generous blob of glue both, and apply them in between the arms of the barrettes, like below:

Complete!
